* Return port bulkhead adapter, allowing the internal SAE return hose to connect through the top lid.

** Hoses for both 8 mm and 10 mm fuel pump outlets are included. Use the hose that fits your pump; the other is used for the return to route fuel into the OEM surge pot at the bottom of the tank.

OEM fuel level sender integration, ensuring full full function of the factory fuel gauge.

The fuel pump hanger integrates the OEM fuel level sender, which clips directly onto the top lid without any modification.

The OEM fuel level sender is required for the fuel pump hanger kit, as it reuses the factory fuel pump location.

OEM fuel filler hose integration.

The fuel pump hanger is designed to use the OEM ID 40mm fuel filler hose and is not compatible with the Nuke Performance corrugated fuel filler hose.

Can the fuel pump hanger fit two internal fuel pumps?

The fuel pump hanger kit is primarily designed for a single aftermarket fuel pump, but the top lid is prepared with an extra 1/4 BSPP port and electrical connector to support future dual-pump upgrades.

A dual in-tank setup requires an additional single fuel pump kit and a custom mounting solution, with standard 39 mm fuel pumps recommended for easiest fitment.
